Full-lifecycle data professional working as a Data Scientist in corporate finance and as a freelance ETL Developer for e-commerce analytics: scopes, builds, tests and deploys automation, machine-learning and data-pipeline solutions, then drives their adoption through consultancy and teach-back sessions. Holds an MS in Data Science (AIM) and a BS in Computer Engineering, summa cum laude.

PROFESSIONAL EXPERIENCE

Chevron Holdings Inc. **Makati City, PH**
Data Scientist **Oct 2025 - Present**

- Delivered end-to-end finance automation on the Microsoft Power Platform (Power BI, Power Apps, Power Automate, Power Pages, Copilot Studio, Dataverse), consulting for multiple finance departments to convert manual, document-heavy processes into automated workflows with AI document extraction, each initiative scoped for projected FTE savings.
- Developed machine-learning forecasting models and AI-assisted document review, collaborating with cross-functional finance teams to align deliverables with their controls and reporting needs while using prompt-cost analysis to keep AI features economical at scale.
- Spearheaded digital advocacy for the finance organization through teach-back and consultancy sessions that upskilled teams on Power Platform and AI tooling and drove solution adoption.

Growthzacks LLC **Remote**
ETL Developer (Freelance) **Sept 2024 - Present**

- Designed the full lifecycle of a proprietary multi-tenant marketing-analytics platform for direct-to-consumer e-commerce brands — from architecture and system design through implementation, testing, infrastructure and production deployment — bringing the product into production single-handedly as the freelance developer.
- Consolidated marketing and e-commerce data from four platforms (Meta, Shopify, Google Ads and Northbeam) by engineering a custom ETL connector framework with incremental syncs and partial-failure safeguards, producing consistent, normalized warehouse data that brand teams could trust for reporting.
- Streamlined the company's day-to-day operations by automating Excel and Power BI dashboard workflows and embedding Marketing Mix Modeling (MMM) in marketing strategy, optimizing budget allocation and boosting productivity by ~300% in certain operations.

SP Madrid & Associates Law Firm **Parañaque, Philippines**
Data Science Intern **Feb 2024 - Apr 2024**

- Optimized a data analytics pipeline serving 3 clients by integrating Polars Dataframe with Dagster as the data orchestration tool, achieving a ~400% increase in performance.
- Created comprehensive documentation of the analytics pipeline so colleagues could understand it easily and onboard additional clients onto the pipeline.

Bitskwela **Manila, Philippines**
Backend Developer **Jul 2023 - Jul 2025**

- Developed the company's Single Sign-On module using OAuth2.0 to unify the account system across all Bitskwela services, alongside a comprehensive Django REST framework API incorporating webhooks, WebSocket and HTTPs communication protocols.

- Managed the website's backend infrastructure, Database Management System and DigitalOcean cloud deployment, applying database modeling techniques that enhanced storage and retrieval efficiency and kept the site performing optimally.
- Collaborated within a small team of frontend, UI and UX developers using GitHub and Figma to deliver cohesive, comprehensive projects, including the API for Bitscorer, Bitskwela's emerging blockchain developer platform.

EDUCATION

Asian Institute of Management **Makati City, Philippines**
Master of Science in Data Science **Jun 2024 - Dec 2025**
GPA: 4.25
Aboitiz Scholarship Grantee
Data Science Coursework: Network Science; Deep Learning; Neural Networks; Explainable AI; Predictive Analytics; Geospatial Analysis; Machine Learning Operations; Data Engineering; Prompt Engineering
Coursework: Data Visualization; Data Mining and Wrangling; Supervised and Unsupervised Machine Learning

Pamantasan ng Lungsod ng Maynila **Manila, Philippines**
Bachelor of Science in Computer Engineering **Oct 2020 - Sept 2024**
Summa Cum Laude (GWA: 1.2351)
Programming Coursework: Software Engineering; Operating Systems; Data Structures and Algorithms; Computer Architecture and Organization

PROJECTS

Price Optimization Strategy for a 33 g Fortified Milk Sachet **Philippine FMCG company**
Oct 2025
Tools: Python, scikit-learn, CatBoost, XGBoost, SHAP, Streamlit, Pandas, PCA, Hierarchical clustering
- Formulated a data-driven pricing strategy for a challenger brand's 33 g fortified milk sachet in a thin-margin market by modelling market share against competitor prices from 2017–2024 regional Nielsen data, collaborating in a four-member capstone team under three AIM mentors and presenting to the client and defense panel.
- Built a custom multi-output voting regressor (Ridge, CatBoost, Extra Trees and MLP) after benchmarking eight model families across ~35,000 hyperparameter-tuning trials, cutting overall MAPE to 9.13% from a 22.83% historical-mean baseline and the client brand's error to 7.45% from 12.20%.
- Delivered a Streamlit stakeholder dashboard with simulation, optimization, SHAP interpretation and performance tabs, letting the client adjust regional prices and receive share-maximizing recommendations — region-specific cuts of about ₱1.6 lifting share by 0.44–3.00 percentage points while preserving ₱39–144 M annual profit per region.

OTHERS

Languages: English (professional proficiency), Filipino (native)
Software / Technical Skills: Python, SQL, Pandas, scikit-learn, XGBoost, SHAP, Power BI, Azure
Professional Development: Data Scientist Professional – DataCamp, Aug 2022, Data Engineer Pathway Completer – Development Academy of the Philippines (Project SPARTA), Nov 2023, Data Engineer Associate – DataCamp, Jul 2023
Other Relevant Skills: Analytical Problem Solving, Cross-Functional Collaboration, Effective Communication, Adaptable to change
